Miscellaneous Information Re: Lake and River Levels From Manitoba Infrastructure And Transportation

Daily flood reports – these provide more detailed information about flood conditions, potential weather threats, etc. than may be provided in the daily flood bulletins and news releases from the provincial government.

http://www.gov.mb.ca/mit/floodinfo/floodoutlook/forecasts_reports.html#daily_flood_reports

Daily flood sheets -- show water levels on the Assiniboine, Red and Souris rivers, for the area around The Pas and for Manitoba lakes

http://www.gov.mb.ca/mit/floodinfo/floodoutlook/forecasts_reports.html#daily_flood_sheets

Lake information – includes observed lake levels, structure operations (e.g. when the Shellmouth Dam has been operated), lake forecasts, etc.

http://www.gov.mb.ca/mit/floodinfo/floodoutlook/lakes_information.html

Morning conditions reports provide information on water level conditions in various regions of the province

http://www.gov.mb.ca/mit/floodinfo/floodoutlook/forecasts_reports.html#morning_flood_sheets

Coping with Stress

This is contact information for the Manitoba Farm and Rural Support Services line, regional health authorities' crisis lines, etc.

http://www.gov.mb.ca/asset_library/en/spring_outlook/rha_stresslines_factsheet.pdf

This site offers information about handling stress, especially during emergencies such as floods or other disasters.
