## Protein: Get the Power!

As the basic building block for your body, protein is an important part of every cell. Canadian beef is naturally rich in this muscle-making nutrient that is essential for your health.

Scientists are increasingly interested in the role of protein in health beyond the basics of growth and repair. Also, studies show that our bodies naturally burn a few more calories when we eat protein-rich meals. Eating plenty of protein-rich foods may also help to reduce fat around the middle during weight loss and help you maintain a healthy weight. [Click here for more on protein.](#)
